Development of a Novel Fault Indicator for Distribution Automation..................105
Shang-Wen Luan, Jen-Hao Teng, and Chao-Shun Chen

Dispersion Compensation Using Raised Cosine Filter in Optical Fibers..................110
Shivinder Devra and Gurmeet Kaur

Test Coverage Measurement and Analysis on the Basis of Software Traceability Approaches........115
Muhammad Shahid, Suhaimi Ibrahim, and Harithodin Selamat

The Phase in a Quantum-Dot Interferometer Modulated by Rashba Spin-Orbit Interaction........120
R. Y. Yuan

Extracting Soft Issues during Requirements Elicitation: A Preliminary Study.................126
Rahman A. N. and Sahibuddin S.

A Software Redocumentation Process Using Ontology Based Approach in Software Maintenance.................................................................133
Sugumaran Nallusamy, Suhaimi Ibrahim, and Mohd Naz’ri Mahrin

Robust End-to-End Available Bandwidth Estimation for Interactive Satellite networks........140
Minsu Shin, Mankyu Park, Deockgil Oh, Byungchul Kim, and Jaeyong Lee

Low Noise, High Gain LNA at 5.8GHz with Cascode and Cascaded Techniques Using T-Matching Network for Wireless Applications.................................................146
Abu Bakar Ibrahim, Abdul Rani Othman, Mohd Nor Husain, and Mohammad Syahrir Johal

Inserting Safety into Software – Safety Critical Systems – Management Perspective........150
P. V. Srinivas Acharyulu and P. Seetharamaiah

Facsimile Image Compression using Slepian-Wolf Coding Principles and Context Modelling...............157
Raghunadh K. Bhattar, K.R.Ramakrishnan, and K.S.Dasgupta

Improving Measurement Accuracy of Ozone for Optical Absorption Based Atmospheric Monitoring Instrument.................................................................163
Wenjun Li

Organizing Software Project Control Practices.........................................................170
Rohaya Ahmad, Hasmiah Kasimin, Maryati Mohd Yusof, and Abdul Razak Hamdan

Formulating a Software Traceability Model for Integrated Test Documentation: a Case Study.................................................................178
Azri Azmi and Suhaimi Ibrahim
Evaluating Software Configuration Based Approaches to Support Change Maintenance of Granular Software Artifacts

Othman Mohd Yusop and Suhaimi Ibrahim

JNI Fault Tolerance Using Java ProcessBuilder

Yew Kwang Hooi and Alan Oxley
