International Journal of Information and Electronics Engineering

CONTENTS

Volume 2, Number 3, May 2012

Data Transmission at 12kb/s over 32kb/s ADPCM ............................................................ 293
   Muhammed AL-Rawi and Muayed AL-Rawi

Subjective Age Prediction of Face Images Using PCA ......................................................... 296
   Hlaing Htake Khaung Tin

An Effective Method of Security Against Wormhole Attack .................................................. 300
   Mohamed Amine Ferrag and Mehdi Nafaa

TDE-ILD-HRTF-Based 2D Whole-Plane Sound Source Localization Using Only Two Microphones and Source Counting .............................................................. 307
   Ali Pourmohammad and Seyed Mohammad Ahadi

   Chandrakant N, Tejas J, Harsha D, P. Deepa Shenoy, Venugopal K R, L M Patnaik, and Vice Chancellor

EDCA Delay Analysis of Spatial Multiplexing in IEEE 802.11-Based Wireless Sensor and Actuator Networks .............................................................................................................. 318
   Mohsen Maadani, Seyed Ahmad Motamedi, and Mohammadreza Soltani

   Shahram Babaie, Neda Zekrizadeh, and Solamaz Nobahary

Implementation of Wavelet Transform-Based Algorithm for Iris Recognition System .............. 328
   Ayra G. Panganiban, Noel B. Linsangan, and Felicito S. Caluyo

A Novel Scheduling Mechanism Based on Artificial Immune System for Communication between Cluster Head and Cluster Members in WSNs ......................................................... 333
   Arash Nikdel, Seyed Mahdi Jameii, and Hagar Noori

Evaluation of Rough Set Theory Based Network Traffic Data Classifier Using Different Discretization Method .................................................................................................................. 338
   Nandita Sengupta and Jaya Sil

ASSM: Agent Based Source Specific Multicast Routing Protocol for Wireless Mesh Networks ................................................................................................................................. 342
   Mojtaba Khayat

A Multi-Factor Scheduling Algorithm for WIMAX Systems ....................................................... 347
   Ahmed H. El-Shinnawy, Mohamed M. Elgazzar, and Amin M. Nassar
Dominating Set & Clustering Based Network Coverage for Huge Wireless Sensor Networks
Mohammad Mehrani, Ali Shaeidi, Mohammad Hasannejad, and Amir Afsheh
352

A Hybrid System for Detecting Misbehaving Nodes in Ad Hoc Networks
Ali Reza Shahrbanoonzehad, Dina Sadat Jalali, and Ali Harounabadi
358

A Strong Encryption Method of Sound Steganography by Encoding an Image to Audio
V. J. Rehna and M. K. Jeya Kumar
362

Semiconductor Die: Processing and Packaging
Satya Sai Srikant and Rajendra Prasad Mahapatra
366

The Performance Analysis of Fast DCT Algorithms on Parallel Cluster Architecture
Atri Sanyal and Swapan K Samaddar
369

Shahansha Quadri and Garimella Rama Murthy
374

Formal Description of Services Interfaces of SMAL Services in Services Computing Environment
Amit Bhandari and Manpreet Singh
379

Software Tokens Based Two Factor Authentication Scheme
Manav Singhal and Shashikala Tapaswi
383

Secure Migration of Tables across Different Database Management Systems over a Cross-Platform Environment
Pvnss Krishna Murthy, Surabhi Agarwal, Tulsi Garbyal, and Pavan Chakrobarty
387

An UCWW-enabled Mobile Geographic Information System
Ivan Ganchev, Máirtín O’Droma, and Sachin K. Agrawal
391

Design a New Fuzzy Congestion Controller in Wireless Sensor Networks
M. Samimi, A. Rezaee, and M. H. Yaghmaee
395

Identifying the Parameters Affecting Network Coding in Wireless Networks
Najme Zehra Naqvi, Deepika Jindal, Srishti Ahuja, and Priyanka Singh
400

Cyber Crimes: Lessons from the Legal Position of Malaysia and Iran
Nazura Abdul Manap and Hossein Taji
404

Cyber Terrorism: Issues in Its Interpretation and Enforcement
Nazura Abdul Manap and Pardis Moslemzadeh Tehrani
409

Is Database Protected Under Copyright? A Legal Analysis
Nazura Abdul Manap, Safinaz Mohd Hussein, and Mahmud Zuhdi Mohd Nor
414

Design of Framework for Semantic Annotation of Geospatial Data
Preetam Naik, Madhuri Rao, S. S. Mantha, and J. A. Gokhale
418

Bandwidth Management Framework for Multicasting in Wireless Mesh Networks
Manaswi Saha and P. Venkata Krishna
421

A Novel Backoff Algorithm with QoS Support in Heterogeneous Wireless Networks
A. Rajesh and R. Nakkeeran
426
Asymmetric Circular Array Antenna Synthesis Based on Angular Positions
Mangolika Bhattacharya, Sudipta Das, Durbadal Mandal, and Anup Kumar Bhattacharjee
Enhanced Object Oriented WBEM Enabled Solution for Non-Homogeneous Network
M. Mishra and S. S. Bedi
Crypanalytic with Ternary Difference: Applied to Block Cipher PRESENT
Farzaneh Abazari and Babak Sadeghiyan
Improving ertPS Grant Allocation for VoIP Traffic in Silence Duration
S. Amir. Hoseini, S. Saed Rezaie, and H. Taheri
Worm Containment in Gnutella Network with Heterogeneity
Amir-Reza Niakan-Lahiji and Babak Sadeghiyan
Multiplierless FIR Filter Implementation on FPGA
S. M. Badave and A. S. Bhalchandra
Classification of Rice Leaf Diseases Based on Morphological Changes
S. Phadikar, J. Sil, and A. K. Das
Comparison of Different Rule Calculation Method for Rough Set Theory
Nandita Sengupta and Jaya Sil
Confidence Factor Variations for Aerial Threat Perception
M. Anwar-ul-Haq and Shoab A. Khan
Reduction of Neural Network Training Time Using an Adaptive Fuzzy Approach in Real Time Applications
Hamidreza Rashidy Kanan and Mahdi Yousefi Azar Khanian
